Reading Little...
fun with the Dragon Coconut
Ingo Siegner was born in 1965 in Hanover, where he now lives and freelances as a writer and illustrator. The stories about the Little Dragon Coconut go back to when he used to have fun making up stories about the Little Dragon for neighbouring children, and it was not long before this loveable little creature became a popular children's book character.

The Coconut success story goes on!

No way does the Little Dragon Coconut want to go on the school trip to Mushroom Valley. Teacher Bronco Cantiflower is sure to spend hours doing nothing but talk about extinct plants. But then Papa Magnus mentions uncanny creatures that are said to live in Mushroom Valley. Perhaps the trip will turn out to be exciting after all! thinks Coconut. And indeed, Coconut and all the other dragon kids are really kept on their toes, for their teacher might be a clever biologist, but he doesn’t have a clue about quicksands, deep gorges, constrictor snakes and monsters! How lucky for Mr. Cantiflower that he has such adventure-tested students!
The second, eagerly-awaited school story with the Little Dragon Coconut

Amusingly illustrated in colour throughout by the author himself

With extra large print and a clear layout — ideal for early readers!

There is always a lot of traffic on the roads! What a good thing that there are rules. The Little Dragon Coconut tells children about the most important traffic rules: how to cross the road safely; what the various road signs mean; and how to differentiate between left and right. There are also some interesting exercises to improve a child’s awareness and ability to concentrate. These games help children to learn to judge dangers and are an excellent preparation to make sure our youngsters get to school safely.

- Children's atlas with some basic facts about countries, people, continents

**Now’s the time** for a trip round the world, thinks the Little Dragon Coconut when he is given an airplane. And he tells all young Coconut fans age six and up what he sees and gets up to on his travels. On 24 pages, readers are given a first introduction to the Earth and its countries and continents, towns and cities, regions, seas and mountains and a lot more besides. The maps are authentic, and info boxes tell inquisitive first-graders about unknown countries and cultures. A large pull-out map of the world makes this book into an essential basic reference book for every child’s room.
