Peter Wohlleben, born in 1964, studied forestry and spent over twenty years as a civil servant in the forestry commission. He gave up his job because he wanted to put his ideas of ecology into practice, and he now runs an environmentally friendly private piece of woodland. He holds lectures and seminars and has written books on subjects pertaining to woodlands and nature protection. His books *The Hidden Life of Trees*, *The Inner Life of Animals* and *The Secret Network of Nature* have been translated into over 35 languages and are bestsellers in numerous countries.

Peter Wohlleben **The Secret Network of Nature**

[Das geheime Netzwerk der Natur]

How trees make clouds and earthworms control wild boar

Ludwig
224 pages
Format 12,5 x 20,0 cm
September 2017

Nature is full of surprises: deciduous trees influence the rotation of the earth, a bird – the crane – sabotages the production of ham in Spain, and coniferous forests can make rain. What is behind all this? The enthusiastic forester and bestselling writer Peter Wohlleben invites us to delve down into a barely known world and describes the fascinating interaction between plants and animals: How does the one influence the other? And what happens when this finely balanced system goes out of joint?

With the results of the latest scientific research and his own decades-long observations, Germany's best-known forester gives us plenty to marvel at. And we will see the world around us with completely different eyes ...

Press

"Once again, this forester astonishes us with his knowledge of nature." *Bella*

"Peter Wohlleben's main profession is forester in the Eifel region of Germany, but on the side he in effect perhaps be the best biology teacher in the entire country." *Literatur Spiegel*

"In a world where we assume [...] that everywhere are 'hidden networks' that are the misery of our existence, [Wohlleben] reveals to us other networks that are beneficial to us." *Der Spiegel*
