Lili Andersen is the pseudonym of the crime author and art historian Liliane Skalecki. Like her protagonist Louise Dumas, Lili Andersen also has French roots, a love for small Frisian islands and a tendency to cook delicious meals. She lives in Bremen and the South of France with her family.

When Louise Dumas' first relationship and her career as a chef end on the same day, she can't believe her bad luck. She packs up her beloved kitchen knives, straddles her motorbike, turns her back on France and heads for the North Sea. The Frenchwoman wants to rest and recover on the Frisian island of Pellworm, in her godmother Fine's cosy thatched cottage. More than anything, she doesn't want to do any cooking. But when the pop star Klaas Thams asks her to cater for his glamorous party, she accepts. After all, Thams is the biggest star in the pop universe! But when the singer is found dead at the party, Louise's peace is shattered. He apparently died from an allergic reaction to her famous crab cakes. But Louise suspects that there's a lot more to the story...

With numerous recipes from the island chef
