What a joke, it can't possibly go wrong! Jonna wants to prove to her brother Tomek that she is at least as good a detective as television hero Charlie Paletti. Sooner than expected, she finds herself in the middle of a mysterious case: who is the enigmatic taxi driver Paula who disappeared without trace years ago?

Together with Bene, the chess genius at school, detective Jonna sets out to find the answer. Will the elves be able to help her again this time? Or is it more a case of thinking logically, as Bene suggests? In the end, Jonna at least knows one thing for sure: even the most mysterious puzzles are much more fun to solve with others!
