Sandra Grimm studied pedagogy, then worked as an editor at a children's book publishing house, and since then has always dealt with stories for children – whether as an author or as a translator. She lives in Northern Germany with her husband and children.

Everyone is sneezing and coughing. What's happening? There are viruses flowing in the air and sticking to things that people touch.

If you don't keep the distance or touch your face with dirty fingers, you might get sick – and have to stay in bed.

But what can you do to prevent yourself and others from getting a virus: stay at home, keep the distance, wear a mask, sneeze to the arm and into a tissue, and wash your hands!

- An important everyday topic: protecting yourself and others from diseases and viruses
- No other title with this topic available for this age group until now
- Supports parents in difficult situations and with imparting essential knowledge
- Children acquire important everyday knowledge to protect health

Press

"Good for reading out loud [...]. This the first non-fiction book on this theme that sensitises without being frightening."
Stiftunglesen.de

"With this, children will learn in playful way to pay attention to themselves and those around them." *Münchner Merkur*

"Explains the spread of viruses through nice, cute drawings that won't be scary for children." *Kreiszeitung*
