With his new messages, Adamus Saint-Germain imparts a revolutionary method of self-discovery and lifestyle. The acclaimed Ascended Master impressively reveals that our life is a role-playing game – and every one of us automatically plays the role of a "normal human" with all the usual weaknesses, restrictions, and melodramas.

But these limitations can be overcome – and Adamus Saint-Germain shows how this is possible for each one of us. By opening up to a higher consciousness, we adopt the role of the master. We gain a completely new understanding of how reality is created and experienced. Thus we can channel new energy into our lives and finally make full use of our inner potentials.

- The revolutionary method to realise personal mastery in life
- The sequel to the successful Saint-Germain books by Geoffrey und Linda Hoppe: more than 20,000 copies sold
