Penny McLean, after a world career as a popular singer (18 Gold records, numerous awards), has now made a name for herself as a spiritual author. Her books are of the most-read genre in all of Europe.

A veil of forgetfulness surrounds the otherworld. We do not know what occurs after death. Penny McLean, who was born without this "veil", is able to very precisely remember the intangible dimensions that we come from and return to.

This bestselling author captivatingly describes in detail what happens from the moment of death and how the soul travels to the planetary spheres and back to Earth again. She reveals how each of us can prepare for our "final move", the afterlife, and the next incarnation.

A pathbreaking book that imparts the certainty that death is not the end, but the return to a home that is near and dear to all of us!
