

## Create a wonderful balcony in an instant

Ursula Kopp  
**Balconies for the Indolent**  
[Balkon für Faule]

Bassermann MA  
128 pages  
Format 16,2 x 21,5 cm  
March 2017

**Ursula Kopp** has been for many years active in the area of nature and gardening advice books. She is also a non-fiction children's book author.

Many placid balcony gardeners, shying from all but a minimal level of maintenance, naturally yearn for a long-term garden that will practically take care of itself for years and yet will be a pleasing sight from early spring to winter. This is just the book for them, providing many ideas for planning such a "year-round balcony," including choices of plants, containers, and soil, and many tips on planting, care, and design.

- The first and only book on winter-hardy plants and all-season balconies.
