Norbert Pautner has been drawing and painting ever since he has been able to hold a crayon. At some stage he started making up his own stories to go with his pictures and finally decided to turn creating books into a full-time job.

A horse, a digger, a plate of fruit or a famous building – with the brief instructions in this comprehensive manual on how to sketch anybody will be able to draw by the end of the book. The 1000 simple motifs for all purposes quickly find their way onto paper in 3 to no more than 6 steps. Great fun with drawing for children and adults!

- The dead-easy, super fat book of how to draw: conjure simple motifs onto paper in no more than 6 steps
- 1000 super motifs to draw: animals, plants, vehicles, clothing, food, musical instruments, buildings, furniture, articles of daily use, different kinds of sport, famous landmarks, people
